NEW SINGLE KOREAN HYBRID INTRODUCTIONS

NANCY COPELAND

PINK LUSTRE

AGNES SELKIRK CLARK

AGNES SELKIRK CLARK

A very lovely blending of bronzy pink, apricot, and salmon, in combination with the profusion of single blossoms, 3 inches across, produces an exquisite touch of autumn color in the garden. Plants are rugged, yet compact and graceful in habit, and remarkably free in flowering. This new variety, selected from a number of hybrids by Mrs. Clark, a prominent landscape architect, is so delightfully charming that we feel sure it will prove worthy of its distinguished name. In full flower in late September. Height, 2 to 2½ feet.

NANCY COPELAND

Spectrum-red is the dominant color, according to the Ridgway Color Chart. An opalescent sheen, which varies with the autumn

light, produces a changeable color-effect, always delightful, but impossible to describe accurately. The strong, upright plant, completely covered with branching sprays of large, single flowers 3 to 3½ inches across, attains perfection in late September. Altogether distinct and lovely. Very hardy. Height, 2 to 2½ feet.

PINK LUSTRE

A fine single flower, 3 to 3½ inches across, with several rays of petals and good substance. It is a delightful shade of orchid (lælia) pink, quite distinct among all other pink kinds. Remarkably free, it produces strong branching sprays in profusion throughout October. A sturdy-growing variety, so hardy it will prove invaluable for difficult garden conditions. In full flower in late September. Height, 2½ to 3 feet.

INDIAN SUMMER

Vivid, glowing orange that immediately captures attention. It is a large flower, 3 inches across, somewhat shaggy, but altogether attractive and distinct in form. Growth is distinct, erect, and sturdy, never requiring support of any kind. It fills the need perfectly for a late-flowering Chrysanthemum that will not be marred or destroyed by late October frosts. October 15. Height, 2 to 2½ feet.

ROMANY

A lovely flower that truly defies accurate description. The color is between carmine and nopal red. In effect it is a soft glowing red with bronze tone, enhanced or illumined somewhat by the gold petal reverse appearing in the center. Blooms full, double, perfect as a cut-flower, remaining in good condition at least three weeks with ordinary care. Height, 2½ feet. In flower about October 5.

These two varieties were exhibited at the "Garden of the Nations" October, 1935, exhibition and received a "Special Award."

PRICE OF VARIETIES ON THIS PAGE:

Strong-growing plants
from 3-inch pots,
50 cts. each, \$5 per doz.

5 varieties, \$2.00

SPECIAL OFFER P1:
3 each of the 5 varieties
(15 plants in all),
\$5.75

INDIAN SUMMER

ROMANY

SATURN

VENUS

APHRODITE

SPECIAL SEED OFFER

For the first time we offer a limited quantity of Pedigreed Seed from carefully selected parents. This is the strain that produced our choicest named varieties and should not be confused with ordinary seed because years of testing and experimenting are behind it.

Chrysanthemums grown from seed are variable. No one knows what a package of seed will bring forth—therein lies an impelling inducement to the garden enthusiast who likes to experiment.

You can anticipate a profusion of beautiful flowers in a fine blending of the colors that are characteristic of the Hybrid Korean type. The possibility of something entirely new and better developing should not be overlooked.

Seed sown from January until late March will bloom profusely the same year from September until killing frost with good culture anywhere that Chrysanthemums can be flowered successfully.

Single Hybrid Koreans. A choice blending of the finest colors—splendid for cut-flowers or for garden display. \$1 per package of not less than 150 seeds.

Double Hybrid Koreans. These will vary in type, producing single, semi-double, and a proportion of full double sorts. All desirable—some very beautiful. \$1 per package of not less than 50 seeds.

INTRODUCTIONS of 1936

SATURN

Brilliant sparkling orange and bronze, enhanced by a soft orange ring or halo surrounding the golden yellow center. A gorgeous autumn color-effect. It is tremendously free and effective, due to its splendidly robust, branching habit. Flowers are of excellent texture, almost 3 inches across, and are produced in large, graceful sprays. Delightfully fragrant. In flower October 5. Height, 2½ to 3 feet.

VENUS

A new and attractive shade (rhodanthe pink, Ridgway), the general effect of which is lilac-pink with rose-lavender shading. The flower is single, 2½ inches across, with three or four rows of petals. It is remarkably free, with slender, wiry branches that carry a multitude of blossoms on generous sprays. Commencing to flower in late September, it remains effective for a long period, and will appeal to those who like lavender and lilac tones in the garden. Delightfully fragrant. October 1. Height, 2½ feet.

APHRODITE

Imagine a compact, billowy mound 3 feet or more across, tinted with ivory and delicate pink, so completely covered with flowers that only blossoms are visible, and you have a picture of this splendid variety. The color is a soft tint of pink in the opening flowers, changing to ivory-white with the slightest mingling of delicate pink in the fully developed gerbera-like blossoms. Individual flowers are 3 to 3½ inches across. A single plant will make a gorgeous background in the average rockery. It is equally effective grouped in the garden or massed on a slope or bank. October 5. Height, 2 feet; spread, 3 feet.

INTRODUCTIONS of 1935

HEBE

A profusion of delightfully fragrant, silvery pink blossoms completely covers the plant from late September on. Its remarkable freedom and unusual hardiness are invaluable traits, particularly in northern sections where Chrysanthemums are difficult. Enthusiastic reports from Minnesota, Maine, even from far China, more than substantiate all our claims for this fine early variety. Growing to a height of 2½ feet, it presents a lively color mass in the fall garden.

VULCAN

A glowing carmine-red which shades to garnet-crimson and finally to an attractive bronze-crimson as the flower matures. It has a double row of ray-like petals with a conspicuous golden center and is delightfully fragrant. October 5. Height, 2½ feet.

ORION

First Class Certificate, Massachusetts Horticultural Society, 1935. Another new color, brilliant canary-yellow which fairly glitters in the autumn sunlight. Having that lustrous quality peculiar to the Hybrid Korean type, it immediately commands attention among older varieties of similar color. The flowers are single, 3 inches across. Excellent for cutting and a grand garden color. October 5. Height, 2½ feet.

PRICE, ALL VARIETIES ON THIS PAGE:

Strong-growing plants from 3-inch pots, 35 cts. each, \$3.50 per doz.

SPECIAL OFFER Q: 1 each of the 6 varieties, \$1.75

SPECIAL OFFER Q1: 3 each of the 6 varieties (18 plants in all), \$5

VULCAN. Fine erect growth—many flowers

HYBRID KOREAN

Introductions of 1934

ORION. Remarkable for its brilliance

INNOCENCE

It seldom exceeds 18 inches in height, spreads about 2 feet, and is so completely covered with flowers that the plant is obscured when in bloom. The flowers are single, 2½ inches across, pure white on opening, changing later to an attractive soft pink. October 5. Awarded First Class Certificate, Massachusetts Horticultural Society, 1935.

HEBE. Very free and delightfully fragrant

APOLLO

A truly magnificent variety. Great sprays of nicely formed flowers in shades of bronze-red, old-gold, and glowing salmon. This glorious coloring is retained for a long period. A delightful cut-flower. October 12. Height, 2½ feet. Awarded First Class Certificate, Massachusetts Horticultural Society, 1935.

CERES

A lovely combination of old-gold, chamois-yellow, and soft coppery bronze. The mature flower petals appear as if dusted with gold. Handsome, sturdy plant producing a quantity of nicely formed, single flowers in branching sprays. October 10. Height, 2 to 2½ feet.

DAPHNE

An exquisite blending of daphne-pink, with an underlying sheen of lilac-rose, enhanced with prominent golden stamens in the center. The single flowers, 3½ inches in diameter, carried in graceful sprays, are especially frost-resistant. Fine, healthy-growing habit. October 12. Height, 2 to 2½ feet.

DIANA

Chatenay-rose-pink, mingled with lilac-rose and soft salmon, the tones of which vary with the degree of light. The triple rays of petals give an appearance of fullness that is none the less dainty. October 12. Height, 2 feet.

LOUISE SCHLING

The flowers are of good size, fully 3 inches across, with three or four rows of petals, fluffy and distinct in appearance. Glowing salmon-red in color, changing to a lovely soft bronze-salmon as the flower matures. It is a remarkably free-flowering variety, healthy and attractive in its growth alone, and one of the first to flower. In full color October 5.

MARS

Deep amaranth-red, changing to wine-red, overlaid with a velvety sheen. A distinct and striking color-effect. October 15. Height, 2 to 2½ feet.

PRICE, ALL VARIETIES ON THIS PAGE:

Strong-growing plants from 3-inch pots, 25 cts. each, \$2.50 per doz.

GRANNY SCOVILL. For the connoisseur

OLD ESTABLISHED FAVORITES

BARBARA CUMMING

Yellow, shaded bronze. The best early double. August–October.

CRIMSON SPLENDOR

Rich crimson-garnet; almost single. A fine early red. Late September.

GRANNY SCOVILL

A lovely, large flower, fully 4½ inches across, and of nice, fluffy form. The color, a warm coral-bronze, fairly glows under artificial light. In growth it is dwarf and branching, with fine healthy foliage. While a trifle less hardy than the average Chrysanthemum, it is sufficiently outstanding in other respects to merit additional winter care. In full bloom October 10. Height, 2 feet.

JEAN CUMMING

The best white. Large, double flowers. Requires protection. Mid-September.

JEAN TREADWAY

Award of Commendation, Boston, 1935. The flower is large—fully 3 inches across—of perfect Decorative or Aster formation, with excellent substance. On opening, the color is a lovely sparkling pink with a dark rose-pink center, but when fully open it becomes a nice soft lilac-pink shading to white. Of medium height, bushy in growth, and very free. In full flower September 30.

R. MARION HATTON

Fine bright canary-yellow counterpart of Ruth Hatton. Late September.

RUTH CUMMING

The color is rich reddish bronze with terra-cotta shades, aging to an even, soft bronze tone. October 10.

RUTH HATTON

Remarkably free white Decorative Pompon. Altogether reliable. Early October.

PRICE, ALL VARIETIES ON THIS PAGE (except Judith Anderson),
25 cts. each, \$2.50 per doz.

SPECIAL OFFER U: 1 plant each of above 8 varieties, \$1.75

SPECIAL OFFER U1: 3 each of 8 varieties (24 plants in all), \$4.50

JEAN TREADWAY. Distinct and charming

JUDITH ANDERSON

An outstanding new Pompon. Introduced by us last year, it was the sensation in our Pompon section during the display season. Seldom exceeding a height of 1½ feet, it makes a spread of 2 to 2½ feet. The plants are covered with nicely formed, button-type flowers 1½ inches across, of clear butter-yellow. Praised to the skies by those who have grown it, Judith Anderson easily excels other Pompons for garden effect, where its dwarf habit makes it desirable for massing or edging. Fine also as a pot-plant. 50 cts. each, \$5 per doz.
